

CAMERON GREAT LAKES, INC.

MOLECULAR FILTRATION SPECIALISTS

DCL– HS-CL

The chart below shows some comparable data between CGL– DCL and the HS-CL. Both media are sulfate impregnated zeolites, designed for the removal of chlorine and chlorine dioxide.

Media	DCL	HS-CL
Bulk Density, lbs/cubic ft.	60	60
Impregnate	Ferrous Sulfate	Sodium Thiosulfate
% , of impregnate	4.04	4.05
Substrate	Zeolite	Zeolite
Flammability	No	No
Moisture Content	14-17	15 Avg.
Cation Exchange Capacity	Yes	Yes
Dusting	Insignificant	Insignificant
